

**MICROTEX SENSORS FOR DETECTION OF THE WEFT TREAD
IN TEXTILE AIR-JET LOOMS**

Microtex product code: MTX-NT01

New sensor:

- new device and method for weft thread detection in a textile air-jet loom
- not invasive sensor
- sensor position continuously adjustable anywhere along the reed
- with high reliability and sensitivity
- matching with MTX-WCB4 central unit
- patented

Example of application: Somet air-jet loom.
